Why Choose Us?

Range of products

At Essentials (SG) Pte Ltd, we have one of the largest variety of products and consistent supplies of stocks catered to your needs. We strive to become a one stop supplies for the convenience of our clients and partners.

Service

At Essentials (SG) Pte Ltd, you are not just purchasing our products. We have uniquely catered solutions to meet our individual clients' requests. From products customization, storage solutions, ordering process to delivery flexibilities. We are always open to new discussion for a better buying experience.

Strong Brandings

ESSENTIALS
HORECA

Essentials (SG) Pte Ltd – We take great pride in our in house brandings which we spend utmost effort from the R&D process to the manufacturing process. All our products are produced based on 2 main directions:

1. Better quality than the existing market
2. Competitive or better pricing than the existing market

Price

At Essentials (SG) Pte Ltd, We strive to provide the best price to performance ratio. Based on individual buying pattern and buying capacities, we are able to work out even better prices to provide our clients with economic convenience. Our wide variety of products also allows flexibilities and savings from individual range of products.

Quality Assurance

All our products are manufactured to meet all the required standards of individual industries. At Essentials (SG) Pte Ltd, you will only receive certified goods and supplies.

What's the **difference** between vinyl, nitrile, and latex gloves?

Vinyl, nitrile, and latex gloves are all considered medical-grade, but they have unique features.

Nitrile gloves

Nitrile is a type of synthetic rubber. It's incredibly durable, latex-free, and specifically designed for medical applications. Nitrile gloves were first developed during the early 90s'. Since then, they've become the go-to glove for many doctors, nurses, and home caregivers. Nitrile gloves are unique in that they don't tear easily. This feature makes it simple to tell if a glove (or pair of gloves) is compromised.

Latex gloves

Latex gloves are made of rubber. They're comfortable, can be used for medical applications, and encourage optimal finger dexterity. The only real downside is they're made of latex. Researchers estimate more than 1% of Americans suffer from a latex allergy. If your loved one is one of these individuals, make sure to use nitrile or vinyl gloves instead.

Vinyl gloves

Vinyl is a synthetic polymer derived from petroleum. It's latex-free, affordable, and used in dozens of applications. Vinyl gloves can be found at nearly any retailer, but they aren't ideal for caregiving. That's because they're less durable than nitrile or latex gloves and provide limited protection against chemicals, bacteria, and other microbes.

What are nitrile, vinyl, and latex Gloves Used For?

Nitrile gloves

Nitrile gloves are used for a variety of industrial, domestic, and healthcare purposes. Nitrile gloves are the popular choice for health care workers, dentistry, beauty shop owners, healthcare providers, laboratory work, food handling, chemical handling, and general industrial tasks.

Nitrile protective gloves can also be found in the automotive industry and janitorial industry. Nitrile was found to be more durable than vinyl when performing gripping tasks with power tools and picking up tools like wrenches and screwdrivers.

Vinyl gloves

Vinyl gloves are frequently used for food handling, food preparation, low-risk health care applications, light clean-up jobs, and repetitive assembly line or manufacturing tasks. These products are commonly used in non-hazardous situations and low-risk infection environments because of the low level of protection offered. They work great for the food and beverage industry.

Latex gloves

Latex is also quite popular among workers who need frequent glove changes, whether that's the healthcare industry or elsewhere. In many cases, you would need powdered gloves to provide the same comfort level as latex powder-free gloves.

For this reason, latex is also popular among laboratory workers. It does quite well with most biological agents, though natural rubber does not perform well around certain solvents.

Product Catalogue

Personal Protective Equipment

Nitrile Gloves (Black - Powder Free)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

Nitrile Gloves (Blue - Powder Free)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

Latex Gloves (Natural - Powder Free)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

Vinyl Gloves (Blue - Powder Free)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

Applications :

-  Medical Purpose / Examination
-  Food handling
-  Industrial purpose / PPE
-  Laboratory
-  Healthcare / nursing
-  Cleaning industry
-  General housekeeping
-  IT Industry

Vinyl Gloves (Clear - Powder Free)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

-  Food handling
-  Industrial purpose / PPE
-  General housekeeping

Vinyl Gloves (Blue - Powdered)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

-  Food handling
-  Industrial purpose / PPE
-  General housekeeping

LDPE Gloves (Clear)

100 pcs/box, 100 boxes/carton
Size Available : M, L

-  Food handling
-  Cleaning industry

Vinyl Gloves (Clear - Powdered)

100 pcs/box, 10 boxes/carton
Size Available : S, M, L, XL

-  Food handling
-  Industrial purpose / PPE
-  General housekeeping

PP, PE or viscose?

The best disposable materials and what they can

PE = Polyethylene

PE is very versatile and available in different thicknesses (my). PE is hygienically tight, stretchy and tough. As a clothing, PE protects against liquids. Basically, there are three types:

- LDPE (low density PE): soft and flexible
- HDPE (high density PE): tear-resistant and stiff
- MDPE (medium density PE): stronger than LDPE, but more flexible than HDPE

PP = Polypropylene

PP is a thermoplastic and acts as a nonwoven like woven fabric. PP nonwoven is breathable and comfortable. It provides light protection against liquids because splashes roll off. HYGOSTAR products are made of pure PP. They are particularly evenly woven and very tear-resistant.

Nylon

Very breathable synthetic fiber with extreme elasticity that adapts to every movement.

CPE = Chlorinated Polyethylene

Chlorination makes PE more durable and stronger. It resists mechanical stress and wetness very well. Ideal as a strong sole for disposable overshoes.

Viscose

Regenerated cellulose, which is processed into fabric. Viscose is extremely skin-friendly and the number 1 when it comes to comfort. Clothing made of viscose has a thermo-regulating effect. Your advantage: Sweat is absorbed, less heat accumulation and a pleasant body climate.

SMS

3-ply material. Two layers of PP fleece enclose a layer of meltblown. SMS is particularly breathable, soft and comfortable.

Selection guide of materials

material	greatest advantage	waterproof	water resistant (temporary)	breathable	food safe	comfort	durability	price
PE	liquid-tight	✓	✓	–	✓	–	✓	€
CPE	durable	✓	✓	–	✓	–	✓	€€

CLIP CAP

Disposable Headwear

This Premium Clip Cap is made of high quality non-woven material, breathable, lightweight, non-absorbent and economical. It is compactly folded in strip and easily open to shape.

Non Woven Clip Cap

100 pcs/pack, 10 packs/carton

Color Available :

Face Mask

Disposable Surgical Mask

Pro+Guard 3 Ply Surgical Mask are manufactured according to the highest standards which are intended to be worn by individuals personnel to prevent transfer of microorganisms/bacterias, body fluids and particulate materials .

3 Ply Surgical Face Mask

50 pcs/box, 40 boxes/carton

Color Available :   

Spit Guard

10 pcs/box, 20 boxes/carton

Labcoat

Disposable Labcoat

Non Woven Lab coat (velcro type)

1 pcs/pack, 50 packs/carton

Size Available : M, L

Color Available :  

PE Apron

Disposable Apron

Reasonable polyethylene apron Food processing, fishery processing, product inspection, etc.

PE Apron - Premium (Long)

50 pcs/pack, 10 packs/carton
Color Available : ○

PE Apron - Ideal (Long)

100 pcs/pack, 10 packs/carton
Color Available : ○

Shoe Cover & Oversleeves

Disposable Shoe Cover & Oversleeves

Non Woven Anti-Skid Shoe Cover

100 pcs/pack, 10 packs/carton

Color Available : ●

CPE Shoe Cover - Blue

100 pcs/pack, 20 packs/carton

Color Available : ●

PE Over Sleeves

100 pcs/pack, 20 packs/carton

Color Available : ●
