NITRILE GLOVES

Nitrile is a type of synthetic rubber. It's incredibly durable, latex-free, a n d specifically designed for medical applications. Nitrile gloves were first developed during the early 90s'. Since then, they've become the go-to glove for many doctors, nurses, and home caregivers. Nitrile gloves are unique in that they don't tear easily. This feature makes it simple to tell if a glove (or pair of gloves) is compromised.

USED FOR

Nitrile gloves are used for a variety of industrial, domestic, and healthcare surposes. Nitrile gloves are the popular choice for health care workers, dentistry, beauty shop owners, healthcare providers, laboratory work, food handling, chemical handling, and general industrial tasks.
Nitrile protective gloves can also be found in the automotive industry and janitorial industry. Nitrile was found to be more durable than vinyl when performing gripping tasks with power tools and picking up tools like wrenches and screwdrivers.

VINYL GLOVES

Vinyl is a synthetic polymer derived from petroleum. It's latex-free, affordable, and used in dozens of applications. Vinyl gloves can be found at nearly any retailer, but they aren't ideal for caregiving. That's because they're less durable than nitrile or latex gloves and provide limited protection against chemicals, bacteria, and other microbes.

USED FOR

Vinyl gloves are frequently used for food handling, food preparation, low-risk health care applications, light clean-up jobs, and repetitive assembly line or manufacturing tasks. These products are commonly used in non-hazardous situations and low-risk infection environments because of the low level of protection offered. They work great for the food and beverage industry.

LATEX GLOVES

Latex gloves are made of rubber. They're comfortable, can be used for medical applications, and encourage optimal finger dexterity. The only real downside is they're mad e of latex. Researchers estimate more than 1% of Americans suffer from a latex allergy. If your loved one is one of these individuals, make sure to use nitrile or vinyl gloves instead.

USED FOR

Latex is also quite popular among workers who need frequent glove changes, whether that's the healthcare industry or elsewhere. In many cases, you would need powdered gloves to provide the same comfort level as latex powder-free gloves. For this reason, latex is also popular among laboratory workers. It does quite well with most biological agents, though natural rubber does not perform well around certain solvents.

HAND PROTECTION

Nitrile gloves are manufactured using synthetic latex, contain no latex proteins, and are more puncture resistant than natural rubber. Powder Free Nitrile Gloves are anti-static in behaviour, good solvent resistant, odour free.

- ✔ Single Use
- ✔ Non-Serile
- ✔ Latex Free
- ✔ Powder-Free
- ✔ Ambidextrous
- ✔ Medical Grade

NITRILE EXAMINATION GLOVES

100 pcs/box - 10 boxes/carton

Product	Nitrile Gloves
Materials	NBR Nitrile
Specification	Non-Sterile
Type	Powder-Free
Size	S / M / L / XL
Color	Blue / Black

HAND PROTECTION

Vinyl gloves are a popular choice for the food industry and situations where high levels of durability and protection are less of a priority. While they may be less durable, they are the less expensive option.

- ✔ Single Use
- ✔ Non-Serile
- ✔ Latex Free
- ✔ Powder-Free
- ✔ Ambidextrous
- ✔ Medical Grade

VINYL EXAMINATION GLOVES

100 pcs/box - 10 boxes/carton

Product	Vinyl Gloves
Materials	PVC Vinyl
Specification	Non-Sterile
Type	Powder-Free / Powdered
Size	S / M / L / XL
Color	Blue / Clear

Materials Type

PP = Polypropylene

PP is a thermoplastic and acts as a non-woven like woven fabric. PP non-woven is breathable and comfortable. It provides light protection against liquids because splashes roll off. HYGOSTAR products are made of pure PP. They are particularly evenly woven and very tearresistant.

Viscose

Regenerated cellulose, which is processed into fabric. Viscose is extremely skin-friendly and the number one when it comes to comfort. Clothing made of viscose has a thermo-regulating effect. Your advantage : Sweat is absorbed, less heat accumulation and a pleasant body climate.

Nylon

Very breathable synthetic fiber with extreme elasticity that adapts to every movement.

PE = Polyethylene

PE is very versatile and available in different thicknesses (my). PE is hygienically tight, stretchy and tough. As a clothing, PE protects against liquids. Basically, there are three types :

- LDPE (low density PE): soft and flexible
- HDPE (high density PE): tear-resistant and stiff
- MDPE (medium density PE): stronger than LDPE, but more flexible than HDPE

CPE = Chlorinated Polyethylene

Chlorination makes PE more durable and stronger. It resists mechanical stress and wetness very well. Ideal as a strong sole for disposable overshoes.

SMS

3ply material. Two layers of PP fleece enclose a layer of meltblown. SMS is particularly breathable, soft and comfortable.

Material	Greatest Advantage	Waterproof	Water Resistant (temporary)	Breathable	Food Safe	Comfort	Durability	Price
PE	Liquid-tight	✓	✓		✓		✓	$
CPE	Durable	✓	✓		✓		✓	$$
PP	Breathable		✓	✓	✓	✓	✓	$$
Nylon	Very Breathable			✓	✓	✓	✓	$$$
SMS	Extra Soft		✓	✓	✓	✓	✓	$$$
Viscose	Comfort			✓		✓	✓	$$$

HAND PROTECTION

Sleeve covers is primarily used for protection and hygiene in various settings. They act as a barrier against contamination, chemicals, and other hazards, and can also offer support and warmth.

- ✓ Anti-Dust
- ✓ Waterproof
- ✓ Elastic Cuffs
- ✓ Comfortable
- ✓ Strong Resilience

SLEEVE COVER

100 bag/box - 20 bags/carton

Product	Sleeve Cover
Materials	PE Material
Specification	Non-Sterile
Color	Blue

HAND PROTECTION

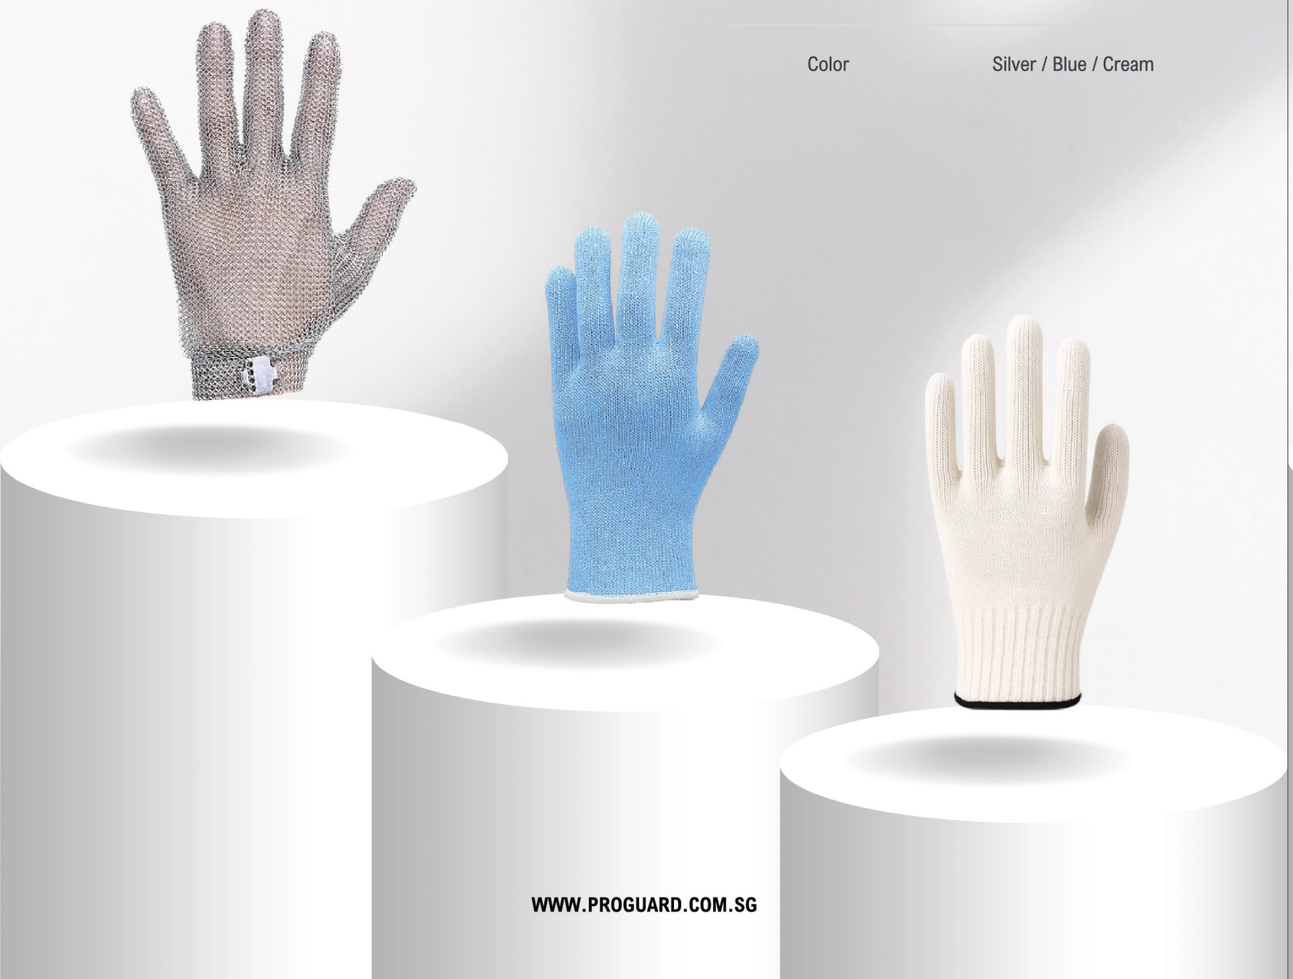

In personal protective equipment (PPE), cut-resistant gloves are those designed to protect the wearer's hands from cuts while working with sharp tools.

- Anti-Tear
- Breathable
- Ambidextrous
- Enhance Grip

STAINLESS STEEL / ANTI-CUT / COTTON GLOVES

1 Pc - 1 Pair

Product	Protective Gloves
Materials	Stainless Steel / Cotton
Size	S / M / L / XL
Color	Silver / Blue / Cream

HEAD PROTECTION

Clip cap is used for providing protection to the head or hair in hairdressers, nail and beauty salons and also to protect the environment or food preparation / production from hairs and other contaminants whilst in a factory or industrial setting.

- Non-Woven
- Eco-Friendly
- East To Wear
- Soft Non-Irritating

CLIP CAP

100 pcs/bag - 10 bags/carton

Product	Clip Cap
Materials	Non-Woven
Type	Double Elastic
Color	White / Black / Blue

FACE PROTECTION

Our mask consists of three layers: two layers of soft non-woven cloth and one layer of bacterial filtration material, which provides good barrier protection and low breathing resistance.

- 99% BFE
- Single Use
- 3Ply Material
- Fluid Resistant

SURGICAL FACE MASK

50 pcs/box - 40 boxes/carton

Product	Surgical Mask
Materials	Non-Woven
Specification	Non-Sterile
Color	White / Black / Blue

WWW.PROGUARD.COM.SG

FACE PROTECTION

Spit guards, also known as spit hoods or spit masks, offer benefits like protection from respiratory droplets, improved hygiene, and reduced risk of disease transmission.

- Anti-Fog
- Reusable
- Low Carbon
- Environmental Friendly

SPIT GUARD

10 pcs/box - 20 boxes/carton

Product	Spit Guard
Materials	PP Material
Specification	Non-Sterile
Color	Transparent

WWW.PROGUARD.COM.SG

BODY PROTECTION

Our water-resistant PE Aprons provide excellent coverage and protection against non-harmful particles and liquid splashes. They are ideal for use in food handling and processing industry.

- Hygienic
- Anti-Dust
- Flexible Fit
- Extra Thickness

APRON

50.100 pcs/bag - 10 bags/carton

Product	Apron
Materials	PE Material
Type	Premium / Ideal
Color	White

BODY PROTECTION

Disposable lab coats are single use apparels that protect against chemical, biological and radioactive exposures. These are tough, lightweight, full-length, flexible, superior comfort / breathability, liquid spray / splash resistant and are anti-static.

- Anti-Tear
- Anti-Dust
- Non-Woven
- Easy To Wear

LAB COAT

1 pc/bag - 50 bags/carton

Product	Lab Coat
Materials	Non-Woven
Size	M / L
Color	Blue / White

LEG PROTECTION

Shoe cover is a tool to maintain the cleanliness or upkeep hygiene related environment, generally, in food and healthcare settings. It provides the basic barrier against any direct contact.

- Anti-Skid
- Anti-Dust
- Flexible Fit
- Elastic Rubber Band

SHOE COVER

100 bag/box - 10.20 bags/carton

Product	Shoe Cover
Materials	Non-Woven / CPE
Color	Blue

LEG PROTECTION

Safety boots offer crucial protection against workplace injuries by shielding feet from hazards like falling objects, sharp objects, and slips, while also providing comfort and support for long work hours.

- Anti-Static
- Cut Resistant
- Wider Fit
- PVC Free

SAFETY BOOOTS

1 pair/box

Product	Bekina Boots
Materials	Neotane
Type	SolidGrip
Size	36 - 49
Color	Blue / White / Yellow / Green
